EDUCATION

California State University, Fullerton

Bachelors in Science, Computer Science | Lead Student Developer

Fullerton, CA

Expected May 2028

RELEVANT COURSEWORK

Data Structures, Systems Architecture, Object-Oriented Programming, Linear Algebra, Multivariable Calculus

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Dart, SQL, C++

Backend & Architectures: FastAPI, Flutter Web, Node.js, RESTful APIs, Relational Schema Design

Deployment & Cloud: Docker, DigitalOcean, GitHub Actions, CI/CD pipelines, Vercel

Version Control: Git, PR Reviews, Advanced Branching, Merge Conflict Resolution

EXPERIENCE & LEADERSHIP

CSUF Computer Science Club (ACM)

Aug. 2025 – Present

Development Board Officer

Fullerton, CA

- Co-directed a 4-person Development Board within a 50-officer hierarchy, managing strict Git workflows and PR reviews for a 2,300-member organization.
- Architected technical curriculum covering CI/CD DevOps, full-stack API architecture, and automated deployment via NPM.
- Instructed members in React, Tailwind CSS, clean code debugging, and web accessibility to accelerate hackathon readiness.

Code Ninjas

May 2026 – Present

Technical Coding Instructor (Sensei)

Anaheim, CA

- Instructed 50+ students in computational thinking, conducting code reviews to resolve event-driven runtime bugs.
- Engineered Python scripts to optimize operations, eliminating 15+ hours of manual data entry while ensuring data integrity.

Anaheim Union High School District

June 2023 – Aug. 2023

Information Technology Automation Intern

Anaheim, CA

- Engineered reliable Python automation scripts to standardize remote software deployments across 8+ physical campuses.
- Diagnosed complex network bottlenecks with senior engineers, troubleshooting hardware infrastructure for 1,000+ clients.

PROJECTS

Ufoodie Digital Storefront | Full-Stack Web, B2B Client Deployment

June 2026

- Architected and shipped a mobile-responsive digital storefront MVP to modernize operations for a commercial B2B client.
- Digitized legacy workflows, supporting 500+ weekly customer interactions with UI optimized for mobile-first accessibility.
- Managed the end-to-end product lifecycle, from initial client scoping and systems design to final production deployment.

PicTalk Cloud API | FastAPI, PostgreSQL, Automated Diagnostics

Mar. 2026 – Apr. 2026

- Architected a highly scalable FastAPI microservice to ingest cloud payloads, optimizing data throughput and compression.
- Engineered CI/CD pipelines to push validated code to production servers, processing 10,000+ mock daily async events.
- Managed strict version control strategies, treating rapid branching and async code reviews as standard daily protocol.

Disneyland Transit & Economic Engine | FastAPI, Flutter Web, Docker

May 2026 – June 2026

- Architected a Dockerized FastAPI proxy server to securely route Google Maps API payloads, implementing IP-based rate limiting via SlowAPI to prevent malicious traffic.
- Engineered a Flutter Web client utilizing a Dart-to-JavaScript interop bridge to dynamically render live transit polylines across 50+ property datasets.
- Configured a unified cloud routing system within a DigitalOcean App Spec, eliminating CORS vulnerabilities and automating regression testing via pytest.
